

Test plan – Accu Weather

Project Name: AccuWeather QA Testing

Tested By: Milica Milosevic

Date: 13-07-2025

Website URL: <https://www.accuweather.com/>

Test Objective: Verify core functionalities of AccuWeather website including search, navigation, video section, newsletters, data suite, health & weather info, and legal links.

Test Scope:

- Search functionality (empty, invalid, valid input)
- Current location weather display
- Sidebar navigation and menu button
- Video section functionality
- Newsletters and Data Suite links
- Dropdown menus
- Forensics & Contact Us redirections
- API reference page access
- Air quality and allergy info
- Terms of Use page

Test Types:

- Functional Testing
- UI/UX Testing
- Navigation & Redirection Testing

Test Environment:

- Browser: Chrome (latest version)
- OS: Windows 10
- Tools: Selenium WebDriver, Python, WebDriverManager

Pass/Fail Criteria:

- Test passes if actual result matches expected results without errors.
- Test fails if any assertion does not match expected results.
